

We all know that energy conservation is important.

Turning off lights and appliances when not in use has become second nature for us but do you really understand how much our appliances cost to run?

Knowing the facts can help you trim your energy bill and protect the environment.

The City of Union, Piedmont Municipal Power and Enercom have teamed to offer you “Energy Depot” on the City of Union’s website www.cityofunion.org.

Energy Profile – is a comprehensive analysis of your home’s energy use and identifies cost saving opportunities.

Energy Calculator –use to determine the approximate energy consumption and cost for most home appliances.

Comparison Tool – compare the annual energy use and costs to operate heating and cooling equipment, water heaters, or lighting in your home.

Energy and the way we use it, is an important environmental issue facing the country.

Energy Conservation can mean huge savings on your energy bill.
