

WHAT IS NATURAL GAS?

Natural gas is a non-toxic, colorless fuel, about one-third lighter than air. Gas burns, but only when mixed with air in the right proportion and ignited by a spark or flame. In its purified state, it has no smell. For your protection, a harmless, distinctive odor (similar to rotten eggs) has been added so you can detect and report the slightest gas leak.

**If you detect this odor and suspect a gas leak, please call
the City of Union**
